

Tyra Future Development Tyra East G (TEG) & Tyra East H (TEH) Jackets.

Client:

Location: Danish sector of the North Sea

Construction Site: Cadiz - Spain

Completion Date: March 2020

Contract Type: Lump Sum

Total weight: TEG Jacket 6.338 tons & TEH Jacket 3.923 tons (excluding piles).

Project Description: The Tyra field comprises the Tyra East and Tyra West facilities. The field has been in production for thirty years, and the existing facilities are suffering from seabed subsidence. New facilities are therefore planned to be installed at higher elevations in order to continue production from the Tyra field and associated satellites.

This Contract covers the following facilities:

- Tyra East G (TEG) jacket and piles. This jacket shall support the TEG platform, a new Process and Utility platform for the Tyra East facility
- Tyra East H (TEH) jacket and piles. This jacket shall support the TEH platform, a new Accommodation platform for the Tyra East facility

Scope of work: Dragados Offshore's scope of work covers project management, HSEQ management, procurement, construction, preservation, preparation for sail-away including load-out, sea-fastening and handover of the Tyra Jackets TEG (Jacket for the Process and Utility Platform) and TEH (Jacket for the Accommodation Platform).
