

## CAPTAIN

Client: **TEXACO**  
Location: North Sea  
Construction Site: Cadiz Yard - Spain  
Completion Date: June 1996  
Contract Type: Alliance Contract  
Total Weight: 2,000 tons

**Project Description:** The Captain FPSO is located in the TEXACO's Captain Field in the British North Sea. The field is located about 140 kilometers north-east of Aberdeen and has estimated reserves of around 350 million barrels; it is expected to reach peak production of some 60,000 bpd.

**Scope of Work:** Our SOW included fabrication, sea transportation, and hook up and commissioning of 6 PAUs of various sizes. The fabrication work was performed in our Cadiz yard. Once the modules were completed they were transported by sea to the North of Spain for final integration to the hull. The integration was managed and partially performed by our team to ensure continuity of knowledge.
