

## PG-ZAAP-C

Client: **PEMEX**

Location: Cantarell (Gulf Of Mexico)

Construction Site: Tampico Yard - Mexico

Completion Date: November 2011

Contract Type: Lump Sum

Total Weight: 12,000 tons

**Project Description:** The target of this project is to achieve the supply of 48 MW power in order to satisfy the electricity demand of the electric centrifugal pumps that PEMEX is installing to maximize the crude production in the Ku Maloob Zaap Field. The generation platform will be linked to the existing PB-ZAAP-C Production Complex using a bridge, and a submarine cable network; the peripheral platforms will be fed with 34.5 KW.

**Scope of Work:** Our SOW consisted on the detail engineering, procurement, fabrication, load-out, sea fastening, transportation, installation, and commissioning of the electrical generation platform PG-ZAAP-C.
